

Cold Therapy System III

Precise, localized cold therapy to
reduce pain and swelling

Interchangeable wraps

Compared to other systems:

- 5 Levels of water compression, **reducing pain and swelling quicker**
- Pulsates instead of static compression for **better blood and lymphatic flow**
- Time control and temperature display for **treatment that adapts to you**
- Large 7.2L capacity **stays colder longer**
- Interchangeable wraps* to **treat different body areas and modalities**

*Full kit contains chosen wrap, additional wraps sold separately

Built for faster healing and smarter recovery. Engineered for ease of use, it features ultra-quiet operation, five levels of intermittent compression, and up to 120 minutes of customizable treatment time. This ensures every patient gets the right intensity for their recovery stage.
